Compact Instrument Winch

Instrument winch designed to control the camera or sensor position underwater, either on vertical (depth) position or horizontal position across a fish farm cage for example. Precision gear motor drive, manufactured in corrosion proof Stainless steel and Delrin. The winch connects directly to our wireless camera radio pods enabling remote control from the camera system control console.

Specification

Compact Instrument Winch	
Construction Material	Stainless Steel and Delrin
Power Consumption	12 Volt 2 Amp, or 24 volt 1 amp
Speed and Capacity	60rpm (10Kg in air)
Dimensions	180mm x 160mm x 130mm
Weight	Approx 3Kg
